

ABSTRACT"A BRUSH"

A brush comprises a first body (2) and a second body (1) mounted on the first  
body (2). The first body (2) has a first set of holes (4) therein and the second body (1)  
has a second set of through holes (3) therein corresponding in number and spacing to  
the first set of through holes (4). The first body (2) is moveable relative to the second  
body (1) between a first position in which each hole (4) in the first set is aligned with  
a respective hole (3) in the second set to receive therethrough a bristle bundle (5), and  
a second position in which each pair of holes (3,4) is misaligned to clamp the bristle  
bundle (4).
